Pest Contractors

If you don't have a relationship with a pest control company, the British Pest Control Association may be able to help and they maintain an accreditation system for pest control companies. Look for the letters BPCA. www.bpca.org.uk

Carbon dioxide treatments are currently only available through Rentokil (see your local Yellow Pages) and Igrox.

Polythene is available through packing supply companies.

Barrier films and Ageless™ are available from Preservation Equipment Limited www.preservationequipment.com and Conservation by Design www.conservaion-by-design.co.uk

Bird netting and spikes can be obtained through BPCA registered pest control companies, who will fit them.
